

Alejandro Gilabert Ramírez

Senior Product Manager | Custodia de Activos Digitales | Tokenización | Infraestructura de Pagos
Madrid, Spain | alejandro97gilabert@gmail.com | linkedin.com/in/alejandrogilabertramirez | alexgilabert.xyz

PROFESSIONAL SUMMARY

Product leader with 5+ years in digital asset custody, tokenization, and Custody-as-a-Service for regulated institutions, including taking a bank's core-banking custody integration from architecture through production go-live. Currently designing B2B SaaS custody solutions at Bitpanda for banks, fintechs, and asset managers entering digital assets. Track record expanding regulated digital-asset infrastructure across Spain and Andorra, with pilot projects in Luxembourg, the UAE, and Latin America, combining a technical background in systems and cybersecurity with product strategy and stakeholder management. University lecturer in blockchain and digital assets across multiple institutions.

CORE COMPETENCIES

Product & Leadership: Product Strategy, End-to-End Ownership, Roadmap Prioritization, Stakeholder Management, Go-to-Market, Scrum, Kanban.

Blockchain & Digital Assets: Custody-as-a-Service, Tokenization, DeFi, Smart Contracts, MiCA, Travel Rule, AML/Compliance.

Technology & Architecture: API-first Product Design, SaaS Platforms, Microservices, Cloud & On-premise Architecture, Cybersecurity.

Tools & Programming: Python, Java, SQL, Figma, Control-M, Linux.

PROFESSIONAL EXPERIENCE

Senior Product Manager

Jun 2026 – Present

Bitpanda Technology Solutions — Madrid / Remote

- Define and prioritize product requirements for the Custody-as-a-Service platform serving institutional clients (banks, fintechs, asset managers) that want to offer digital assets without building their own infrastructure.
- Own compliance requirements for B2B custody products across regulated jurisdictions (MiCA, BaFin, VASP).
- Design ad-hoc custody solutions for financial institutions expanding their catalogue into digital assets.
- Lead the CaaS roadmap, including wallet management, API integrations, and multichain support.
- Expand supported token and blockchain coverage, growing the asset catalogue available to institutional clients.

Senior Manager, Digital Asset Custody

2024 – May 2026

Onyze (Digital Asset Custody) — Madrid

- Led the evolution and design of the Crypto-as-a-Service platform (custody, brokerage, tokenization) and its API architecture for core banking integrations.
- Took a bank's core-banking custody integration from architecture through production go-live, deploying the crypto module within Credit Andorra's online banking platform.
- Built a Transaction Monitoring compliance tool and led the integration of the Travel Rule for regulated fund transfers.
- Expanded regulatory and market reach across Spain and Andorra, with pilot projects in Luxembourg, the UAE, and Latin America (Argentina, Brazil, Peru).
- Collaborated with cross-functional teams of 5–8 across product, engineering, and compliance to define roadmap, API design, and use cases for banking, institutional, and fintech clients.

Banking Consultant

Oct 2021 – Mar 2024

NFQ Advisory (Banking Consulting) — Madrid

- Murex consultant on FRTB market-risk projects for BBVA, including development of the Bond Return Swaps (BRS) instrument.
- Automated critical workflows with Control-M and designed regulatory datamarts, improving reporting accuracy and compliance readiness.
- Built microservices architecture for banking systems, improving efficiency and resilience of trading and risk platforms.

Java Developer

Sep 2019 – Jun 2021

Sopra Steria (Banking Technology) — Madrid

- Developed Java backend components for financial platforms, focused on scalability and security.
- Contributed to operational backtesting and system performance improvements.

Partner (Entrepreneurial Project)

Sep 2021 – Dec 2023

BlockInvest (Entrepreneurship) — Madrid

- Produced fundamental crypto and DeFi analyses to identify market opportunities and risks.
- Delivered lectures on blockchain, tokenization, and digital-asset strategies for diverse audiences.

TEACHING & TRAINING

University lecturer and corporate trainer in digital assets, blockchain, financial systems, and product management, connecting theory with applied, real-world projects.

University Lecturer

Sep 2024 – Present

CEDEU (University) — Madrid

- Deliver courses on digital assets, blockchain, APIs, and product management, with a practical focus on financial-systems infrastructure.
- Design and assess coursework, guiding students through applied projects bridging theory and real infrastructure.
- Teach cohorts of approximately 30 students per edition; second edition currently underway.

Corporate Training Programs

- **Santander Financial Institute** — Product, Web3, and crypto training programs for financial-market professionals, focused on regulation, risk, and real use cases.
- **Medusa Capital** — Blockchain and digital-asset programs helping teams move from theory to secure production implementations.
- **Instituto BME** — Training on financial markets and digital assets.

EDUCATION
